Probability that a taxon is extant

*Ficedula nigrorufa*-LWSL

Probability that a taxon is extant

The graph displays the population of the United States from 1871 to 2021. The x-axis represents years, with major ticks every 10 years from 1871 to 2021. The y-axis represents the number of people, with major ticks at 0, 50, 100, 150, 200, and 250 million. A thick black line shows the population estimate, which starts at approximately 39 million in 1871, drops to about 23 million by 1881, and then rises to 39 million by 1891. The population remains relatively stable until 1901, after which it grows steadily to about 100 million by 1921. The population continues to grow, reaching approximately 250 million by 2021. A light gray shaded area represents the confidence interval, which is narrowest in the early years and widens significantly after 1901, particularly after 1921.

Year	Population (Millions)
1871	39
1881	23
1891	39
1901	39
1911	50
1921	100
1931	120
1941	140
1951	160
1961	180
1971	200
1981	220
1991	240
2001	260
2011	280
2021	250

The graph illustrates the historical trend of high school graduation rates in the United States. The x-axis represents years from 1870 to 2020, and the y-axis represents the number of people in millions. The data shows a significant increase in high school graduation rates starting in the late 19th century, peaking around 1900, and then remaining relatively stable until the 1980s. After 1980, there was a rapid increase in graduation rates, reaching a plateau around 2010.

Year	Number of people (millions)
1870	~1.5
1880	~1.5
1890	~1.5
1900	~1.5
1910	~1.5
1920	~1.5
1930	~1.5
1940	~1.5
1950	~1.5
1960	~1.5
1970	~1.5
1980	~1.5
1990	~1.5
2000	~1.5
2010	~1.5
2020	~1.5

The graph displays the population of the United States over time. The x-axis represents years from 1871 to 2021, with major ticks every 10 years. The y-axis represents the number of people, with labels at 0, 100, 200, and 300 million. A thick black line shows the population estimate, which starts at approximately 39 million in 1871, drops to about 23 million by 1881, and then rises to 39 million by 1891. From 1891 to 1901, the population remains relatively stable. After 1901, the population begins a steady climb, reaching approximately 100 million by 1921 and continuing to rise to about 330 million by 2021. A light gray shaded area represents the confidence interval, which is narrowest in the early years and widens significantly after 1901, particularly after 1921.

Year	Population (Millions)
1871	39
1881	23
1891	39

The graph illustrates the demographic trend of the aging population in the United States. The y-axis represents the percentage of the population aged 65 and over, ranging from 0 to 20. The x-axis represents the years from 1867 to 2027. The data shows a significant peak in the late 19th century, followed by a decline and then a gradual increase starting around 1907, reaching approximately 25% by 2027.

Year	Percentage of Population Aged 65 and Over
1867	18.5
1877	19.5
1887	18.5
1907	15.5
1927	14.5
1947	13.5
1967	12.5
1987	11.5
2007	10.5
2027	9.5

The graph illustrates the demographic trend of the aging population in the United States. The actual data (thick black line) shows a period of high volatility in the late 19th century, with peaks around 1867 and 1877, followed by a sharp decline and stabilization at approximately 16% by 1907. The projection (gray shaded area) indicates a steady, gradual increase in the percentage of the population aged 65 and over, reaching approximately 18% by 2027.

Year	Actual Percentage (%)	Projected Range (%)
1867	~18	-
1877	~18	-
1887	~14	-
1907	~16	~16 - 16
1927	~16	~16 - 16.5
1947	~16	~16 - 17
1967	~16	~16 - 17.5
1987	~16	~16 - 18
2007	~16	~16 - 18.5
2027	~16	~16 - 18.5

The graph illustrates the demographic trend of the aging population in the United States. The thick black line represents the historical data, showing a period of high volatility in the late 19th century. The light gray shaded area represents the projection, indicating a steady but gradual increase in the percentage of the population aged 65 and over over the next century.

Year	Percentage of Population Aged 65 and Over (%)
1867	~18.5
1877	~18.5
1887	~16.5
1907	~16.0
1927	~16.0
1947	~16.0
1967	~16.0
1987	~16.5
2007	~17.0
2027	~18.0
